

ARCHITECTURE

Message from our Architect: Manuel Orozco.

Villas de la Colina II is the continuation of the excitement that has given life to the C and C Development group, to bring about the atmospheric warmth that belongs to a home, while keeping the Puerto Vallarta taste.

We have worked to capture the balance between the traditional Mexican with modern designs while framing the welcome that the cathedral presents over the roof lines of traditional Vallarta, as soon as the main door opens.

The multi functionality of the interior spaces keeping their privacy and at the same time the option to integrate to an open space where each room has an ocean view; Permitting the wind of the bay co-inhabit in the terrace at breakfast and enter in the totality of the apartment.
